

10 YEARS

Safety for Your Child

Did you know that injuries are the greatest threat to the life and health of your child? Injuries are the leading cause of death of school-aged children. **Yet you can prevent most major injuries** if you and your child take a few simple steps.

At age 10, children will do more things away from home. They will spend more time on a bike or in a car and will not see the need for adults to watch over them. You must take charge; you must **remind your child of safety!** It takes only a few steps to prevent major, common injuries.

Firearm Hazards

It is best to keep all guns out of your home. **Handguns are especially dangerous.** If you choose to keep a gun, store it unloaded and in a locked place, with the ammunition locked separately. Your child is in more danger of being shot by himself, his friends, or a family member than of being injured by an intruder.

Ask if the homes where your child visits have a gun and how it is stored. Talk with your child about guns in school or on the streets. Find out if your child's friends carry guns.

Sports Safety

At this age your child may be playing baseball, soccer, or other sports. Ask your doctor which sports are right for his or her age. **Be sure your child wears the protective equipment made for that sport**, such as shin pads, mouth guards, wrist guards, eye protection, and helmets. Ask your child's coach what is needed.

And Remember Car Safety

Your child must **buckle the seat belt EVERY TIME** he or she rides in any car. Booster seats should be used until the lap belt can be worn low and flat on the hips and the shoulder belt lies across the middle of the chest and the shoulder rather than the face or neck (usually at about 4 feet 9 inches tall and are 8 through 12 years of age). Remind your child to buckle up when riding with others. *Ask your child to remind you to buckle up, too!* Install shoulder belts in the back seat of your car if they are not already there. Serious injuries can happen to your child when a lap belt is used alone. **The safest place for all children to ride is in the back seat.**

Bike Safety

Your child may want to ride his or her bike farther away from home. Teach your child the "Rules of the Road" and be sure your child knows them. You must watch your child to be sure he or she can handle a bike safely. **Make sure your child always wears a helmet** while riding a bike. It is still very dangerous for your child to ride at dusk or after dark. Make sure your child brings in the bike as soon as the sun starts to set.

Would you be able to help your child in case of an injury? Put emergency numbers by or on your phone today. Learn first aid and CPR. Be prepared...for your child's sake!

SAFETY IN A KID'S WORLD

Dear Parent: Your child is old enough to learn how to prevent injuries. The games below are designed to help your child think about safety. Read the messages with your child and talk about them together. Then take this safety sheet home and post it where everyone can see it.

It takes time to form a safety habit. Remind each other what it says. Make safety a big part of your lives.

Get the Helmet Habit!

DIRECTIONS: Break the code to read this message. On each line, write the alphabet letter that comes before the one above that line (the first 2 have been done for you).

BIKE SAFETY

S J E F Z P V S C J L F

DIRECTIONS: Circle the signs that belong to "Rules of the Road." Be a smart and safe rider. Learn the "Rules of the Road."

DIRECTIONS: Use the code key to read this message (the first letter has been done for you).

NEVER RIDE AT NIGHT
Always put your bike away when the sun goes down.
